†Appointed April 3, 1911, in place of Charles W. Ward, resigned. Elected March 7, 1911.

Report of the Mayor

To the Citizens of Rutland:

For the last four years the City government has been operated under the dual handicap of increased expenses, occasioned by unprecedented economic conditions and an inadequate tax rate.

During the "depression," all municipal governments have been faced with new and difficult problems and an ever increasing burden of detail work. This has been as true in the City of Rutland as elsewhere.

Departmental arrangements, adequate under ordinary conditions, have had to be adapted to carrying a burden of additional, and sometimes unfamiliar, work. Some departments have had to fit additional workers into totally inadequate space, while, in other cases, inadequate staffs have been overburdened.

At the same time, all department workers had accepted reductions in pay.

In some cases, to avoid additional expense, we have had to do things as we could, rather than in an ideal manner.

The activities of the Federal Government, along the lines of both work and employment relief, have materially increased the burdens of the Public Works and Charities Departments.

In the field of Public Works, the City of Rutland has taken advantage of all the opportunities offered thru the Federal Government, or otherwise, in so far as such opportunities appeared to be of advantage to the community either in the way of employment or permanent improvements.

Without going into details, which are to be found in the report of the Commissioner of Public Works, the present status of the so-called "Federal Projects" is approximately as follows:

Sewers: It is evident that all of these projects will be completed during 1935. The work already done has greatly improved the drainage situation in the city. When the projects are completed, the main line sewer problem will be solved and most of the troubles experienced by residents in the past as the result of an inadequate sewerage system, will be eliminated. (PWA)

Library: Work on this project is well under way and will probably reach completion early in the summer. The community will then have adequate library facilities. (PWA)

Airport: Work has progressed on this project as rapidly as has been possible under the existing government restrictions

on employment allotment. All expense for labor has been met by the Federal Government. Grading on the main part of the field has been completed, but there is much filling to be done on the extreme west side of the field where there are some deep gullies. When the project is completed, we will have one of the best airports in the state. (CWA-VERA)

Through the cooperation of the State of Vermont, the following projects were carried out during 1934 without expense to the City:

Woodstock Ave.: This street, from the City Line to Main St., was improved with a two-slab, concrete roadway with eight foot shoulders on both sides.

Main Street: This street was resurfaced over the existing concrete from North City Line to Temple St., and from the South City Line to Madison Street.

The City has the promise that the section from Temple street to Madison street will be resurfaced during 1935. It is my hope that this section will also be curbed on both sides.

State St. Bridge: I understand that contracts have been let for a new bridge over East Creek on State Street and for the removal of the car tracks from Pierpoint Avenue to Grove Street the space to be filled in with cement slabs. The street is also to be curbed on both sides.

I believe that both the Federal and State Governments have been very fair in their allotments of funds and projects for the improvement of the City of Rutland.

Added expenses in the Charities Department, during the past year have been, as previously, the direct result of economic conditions generally. Increased expenditure for charities is in no way peculiar to the City of Rutland. Such expenses have been for the necessities of life. Even with all the work relief which has been made available, there has remained a large group of unemployable, unemployed and inadequately employed cases. The last named group presenting an especially difficult problem.

Regardless of all controversial details; the hungry must be fed, the naked must be clothed, the cold made warm, shelter provided for those without means of providing it for themselves, and medical attention given the sick and suffering.

I believe that this department has functioned as efficiently as possible under the circumstances. I know that there has been no wasting of the money of the City through carelessness or neglect.

I would call your attention to the report of the Overseer of the Poor. This report is considerably more in detail than in former years and should make the nature and distribution of the expenses of that department very clear.

I might add that the distribution of Federal Commodities, while of great assistance to the community, has added greatly to the detail work of the department.

In some phases of its work the department has had the cooperation and assistance, without expense to the City, of the Rutland County Chapter of the American Red Cross. That organization has been requested to submit a report covering such work and their report will be found following that of the Department of Charities.

Clear and concise reports have been made by the heads of the other departments and by individual workers. These reports indicate intelligent management and diligent and efficient service.

It is my opinion that it is a grave error for the City to go on from year to year assessing so low a tax rate that it has inadequate funds for taking care of the City's property, providing the services which the citizens evidently desire and expect, and paying an increasing annual amount on bonds coming due and increasing interest charges, to say nothing of the Charities Department expenses, which have been creating a deficit each year for the last four years.

If this method is to be continued, we will soon reach a point where the credit of the City will be injured and we will be in a position where we will have to pay considerably more interest on temporary loans on tax warrants, and where we might be unable to get a loan in an emergency.

Taxpayers must recognize that the City cannot take care of absolutely necessary increased expenses on the low tax rate which has been assessed during each of the last four years.

Neither can the City continue to issue bonds year after year to cover deficits. Bonds have to be paid eventually.

The only alternative, in the present situation, is to add five cents on a dollar, or multiples of that sum, to the tax rate each year to pay off the deficit of the previous year.

I can see no great virtue, or even good ethics, in building up an overwhelming bonded indebtedness as a burden for the coming generation, which will probably have troubles enough of its own.

The debts incurred by the present generation have been very largely for its own benefit and should be paid by that generation.

I wish to thank the heads of the various City departments, and their employees, for their loyal and efficient service to the

City, not only through the year just passed, but during my several terms in office. I think the City of Rutland has as an intelligent and competent an administrative organization as any city in the country, and that this organization has stood up remarkably well under the unusual burdens and pressures arising from the general economic situation and resultant confusion of ideas, motives and policies.

All work has been well done.

I would also thank those members of the Board of Aldermen who have given conscientious and disinterested consideration to the problems of the community and have endeavored to maintain a sound and logical administrative policy.

Respectfully submitted,

ARTHUR W. PERKINS,
Mayor.

Report of City Treasurer

To the Honorable City Council, City of Rutland, Vermont:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1934.

Report of Commissioner of Public Works

The Honorable City Council,

Rutland,
Vermont.

Gentlemen:

The activities of the Department of Public Works and related Federal Relief Projects together with their detailed costs are shown in the following report.

STREET DEPARTMENT

The principal street improvements of the year, the paving of Woodstock Avenue and the resurfacing of North and South Main Streets were not financed by City funds and will be described later in the report.

The car track areas on Merchants Row, Strongs Avenue and West Street, were resurfaced with Warcolite, a hot mixture of asphalt, stone and sand. This surface paving is twenty-two feet wide over double tracks and fifteen feet wide over single tracks. The thickness is one inch. Two hundred and eighty-four tons of Warcolite covered 6,692 square yards of pavement at a total cost of \$2,482.22 or \$.371 per square yard.

Work which was most important and the largest single item in the Street Department was the surface treatment. One hundred and nineteen streets received this surfacing on the roadway and all steep hill streets were also treated in the gutters. This gutter work is already proving its value. The cost of cleaning streets and filling washouts after summer storms has dropped from \$1,056.66 in 1931 to \$207.87 in 1934.

The roadway surface treated totaled 291,486 square yards over a total length of twenty-nine and one-half miles. This required 49,442 gallons of tar and 33,975 gallons of asphalt. In addition to this 9,935 gallons of tar was used for gutter treatment.

Streets in outlying sections where the traffic is not enough to warrant the use of tar or asphalt were treated with 13,650 pounds of calcium chloride.

Cold patching was done with a mixture of tar and fine gravel that was developed in 1933. That the general conditions of the streets is improving is shown by the fact that 315 cubic yards of patching material was used compared with 411 cubic yards in 1933. If high grade surface treatment is continued this patching cost can be still further reduced. The cost reduction during the past year was from \$3,061.72 in 1933 to \$2,269.77 in 1934. For four years prior to 1932 the cost averaged \$3,413 annually.

To my mind the most valuable item classed as a street improvement is the use of a high grade bituminous material for surface treatment. This material forms a layer on the road that builds up year after year thus reducing the cost of preparing the road surface for treatment as well as the cost of patching. After a few years a layer of tar or asphalt will be built up and then every street will not need treatment every year. The money thus saved can be used for further extensions of tar or asphalt surface on outlying streets or on permanent improvements. The reduced cost of preparation of streets in the spring and early summer was demonstrated this year. Grading with the road machine cost \$1,193.50 and rolling cost \$508.71. Previous city reports show that the average cost for five years prior to 1933 was \$4,473.12 for grading and \$960.87 for rolling.

Streets treated with bituminous material this year were broom-dragged to give a smoother surface. Next year a heavier drag will be used to further improve the riding qualities.

It is through the reduction of cost of street maintenance, grading, patching, etc., that the department is able to continue to meet the public demands for service and still keep within the reduced budget.

Show removal was necessary after five major storms, the greatest number in many years. Ice conditions were much worse than usual and necessitated sanding operations that consumed 561 cubic yards of sand. This is as much as used to be required during five normal years. Snow plowing will be accomplished much more quickly than formerly through the addition of a plow operated on a light truck which attains high speed. Thus outlying streets that formerly waited two days to be plowed will now be plowed immediately after a storm. The tractor plow will be used where deep drifts occur in the future.

Gravel was spread on 14 secondary street jobs to improve the roadway surface. Materials from the pit in West Rutland were used. The work required 583 cubic yards of material, none of which was crushed. The advantage of using this pit is that it is located on the concrete highway and heavy loads may be drawn from it during the Spring when most other highways are operated under small load limits.

The cleaning of pavements in the downtown section, both by picking up dirt daily and by frequent flushing, was carried on much the same as in former years. Dirt was removed from catch basins as often as needed. More effort than usual was spent in removing dirt and mud from gutters on practically all streets than was the custom.

Property and equipment was maintained, in fact improved when possible, as an economy measure to prevent the deterioration of expensive, heavy equipment during these times of

financial stress. All machines, though most are quite old, are in serviceable condition.

Many street improvements were carried on where CWA and VERA sewer and grading projects were in operation. In these cases, trucks and other equipment with operators were furnished to facilitate the progress of the federal-aid jobs. These additional costs were borne by the Street Department but the value of the improvements was great. The most important were Campbell and Gleason Road widening, Lincoln Avenue grading, Woodstock Avenue paving and grading, and dirt moving on the Airport as well as several other minor jobs.

It is gratifying to be able to state that in spite of the necessarily restricted budget, with the help of State Aid and Federal funds which will be discussed later, more street work and paving was accomplished than in any previous year. The regular schedule of the Street Department left a balance with the City Treasurer.

STREET DEPARTMENT COST TABLES

PAVEMENTS

SEWER DEPARTMENT

The normal work of this unit of Public Works was less than in previous years for some time. The value of the many sewer jobs carried on by CWA, VERA and PWA is already beginning to be felt. Sewer maintenance cost \$2,199.33 as compared with \$3,147.96 in 1933. These new sewers are carrying off water during storms in sections that formerly suffered much damage and inconvenience.

The department did not do much new work. A line was laid to drain Avenues B and C that formerly had to rely on cesspools. Catch Basins and manholes were properly repaired and five new basins were built.

In connection with CWA and VERA this department acted as a supply depot, furnishing materials, equipment, tools, supervision when needed, trucking and engineering. These items were large because of the huge program carried on with federal funds during the early part of the year but the cost of this was charged to the CWA and VERA materials account and added to the Sewer Department funds, thus offsetting the additional expense.

Work for private individuals was billed at cost to the property owners. In this classification nineteen new connections were installed and many were repaired.

SIDEWALK DEPARTMENT

Repairs to tar and gravel walks, started in 1933, were continued this year. This is the only way by which walks on heavily travelled highways can be maintained in a safe condition. A cold patch preparation similar to that used on roadways, has proved adequate for this work.

GENERAL DEPARTMENT

The bridge over East Creek on Crescent Street was given one complete coat of protective paint. This bridge had been so long neglected that it had deteriorated considerably but the work done has restored it to good condition. It was necessary to use a special paint designed for covering rusty steel.

All culverts were properly maintained and guard rails and bridge and culvert approaches were repaired and painted white to properly protect traffic.

Main Street Park was properly cared for. The grass and shrubs were kept trimmed. In the north half of the park all dangerous limbs and dead wood were removed as a safety precaution. The trees in the south part were similarly trimmed two years ago. Trees in other parts of the city that were reported were taken care of.

The City dump on Gleason Road was operated as in former years. A caretaker supervised the dumping of refuse and kept covered with dirt all material that might become objectionable.

Miscellaneous work performed in this department includes the repair, distribution and setting up of election booths; removal of ashes from City Hall; the purchase of stationery, supplies, engineering equipment, and the cost of janitor service for the city Engineer's office.

Some materials, labor, supervision and services were furnished for CWA and VERA jobs were billed against these accounts.

There were no injuries to employees of the Public Works Department during 1934, and, therefore, no compensation cost.

WATER DEPARTMENT

This department, as during the past eight years, operated under the supervision of Edgar S. Beardsley.

There can be little doubt that the early part of the year 1934 was the severest sub-zero weather during which this department has had to function. The winter of 1917-18 had previously been a record breaker but it required more thawing, patrolling of hydrants and pipe repairs to maintain service during this past winter than ever before. The mean temperature was 4 degrees lower than in 1917-18.

The freezing of services started February 5th and continued until early April. The worst period was February 11th to 24th. A total of 309 services had to be thawed, 55 burst and were repaired, 12 sections of frozen main were repaired, and an inspection patrol of hydrants was maintained for 1037 hours. This prevented the possibility of a hydrant being frozen when needed for fire protection.

This emergency work due to severe weather cost about \$7,000.00 but \$4,000.00 of this was absorbed within the budget. This was possible because new construction was suspended during this period of freezing.

The regular construction of the department followed the requirements of the New England Insurance Exchange to improve the water service and fire protection. This work is progressing well. Most of the new construction is now outside the central part of the city.

On Clement Road west of Ripley Bridge, a 6-inch main was laid nearly to the west line of the city, a distance of 1,980 feet. This department furnished the material but CWA contributed the labor for this project, on which 405 feet of pipe had been laid

in 1933. Two valves and two hydrants were installed on the 1934 project.

On Clement Road from Dorr Bridge west towards Ripley the water department laid 1,287 feet of 6-inch pipe with one valve and one hydrant, thus completing the water circuit from River Street to West Street near the west city limits.

The extension of the Creek Road main south of Dorr Bridge that was in progress at the end of 1933 was continued south 1,608 feet with 6-inch pipe, bringing this main to the south end of the former Temple Farm. Two valves and two hydrants were included in this improvement.

At the corner of East St. and East Center St. two dead ends were connected with 36 feet of 6-inch pipe having one valve.

At the south end of Forest St. two dead ends were eliminated by extending the 6 inch Forest St. Pipe 536 feet to Park St. thus connecting up the Park St.—Forest St. circuit. One valve was set.

The 6 inch main on Howard Avenue was extended east 194 feet and an existing hydrant was moved. One valve was installed.

On Jackson Avenue, Killington Avenue and North Church St. inadequate mains that froze easily were replaced with 6 inch pipe at proper depth. Jackson Ave. east of South Main St. required 1,006 feet of pipe and three valves. Killington Ave. between South Main and East St. needed 754 feet with two valves, and on North Church St. 584 feet of pipe and one valve were laid. This work eliminates three locations that have given much trouble with resulting poor service to consumers. On North Church St. a new hydrant was set north of North Street.

On Stratton Road the 6-inch main was extended south 233½ feet to the vicinity of St. Joseph's Cemetery. This construction included the setting of one valve and a new hydrant.

On Oak Street 180 feet of 6 inch main was laid to give service to a house formerly without water.

A total of 8,398½ feet of 6 inch pipe was laid during the year. Sixteen valves were set on these lines and one valve was inserted on an existing main on West St. near Temple's Crossing. Twelve valves were installed on hydrant branches.

Seven new hydrants were added to the system bringing the total to 305. During the past ten years 84 new hydrants have been installed, a fire protection improvement of 38% which is still further increased if consideration is given to the larger mains and consequent faster flow of water.

There were 20 new service connections, a gain of two over the year 1933. The repairing of services, as has already been mentioned, was very large because of the severe winter weather. The cost was \$6,065.64 while in 1933 it was \$2,203.40. The cost of maintaining meters was nearly double the former year. Repairing mains cost \$2,002.33 as compared with \$345.10. These

comparisons are given to show the damage caused by the frost during early 1934, and the resultant increased maintenance costs during that period.

All the usual work of caring for valves, shutoff boxes, supply mains and all other routine business was performed as usual.

The use of water during the year increased greatly over previous years, reaching an average consumption of 175 gallons per capita per day for the year. The peak came during February, due of course to water left running to prevent freezing in pipes. An average of 230 gallons per capita per day for the city's 17,300 inhabitants was drawn from the reservoir. The following table shows the meter registration throughout the year. The last column shows the figures for 1933, which was an average year, for comparison.

VENTURI METER REGISTRATION

Month	No. of Days	Total Gallons Registered	Average Gals. per day	1934 Average per capita per day	1933 Average
January.....	31	96,010,000	3,097,000	178	171
February.....	28	111,610,000	3,986,000	230	174
March.....	31	116,220,000	3,749,000	216	171
April.....	30	89,910,000	2,997,000	173	151
May.....	31	87,730,000	2,830,000	164	150
June.....	30	85,590,000	2,853,000	165	157
July.....	31	94,460,000	3,047,000	176	160
August.....	31	89,030,000	2,872,000	166	148
September.....	30	84,030,000	2,801,000	162	149
October.....	31	80,510,000	2,597,000	150	142
November.....	30	76,880,000	2,563,000	149	150
December.....	31	91,670,000	2,957,000	171	170
Totals.....	365	1,022,650,000	3,030,000	175	158

Population—Approximately 17,300

It is also evident that during the summer, which was unusually dry, more water was used than previously. During the month of July and August there was not much surplus water but at all times there was plenty to keep the reservoir full in spite of the additional use that consumers were making of the water.

The cutting of cordwood by individuals who are residents of the city was continued on the Mendon watershed. The city receives one dollar per cord for this wood on the stump. A total of 641 cords was cut under this arrangement.

The CWA project of cordwood cutting and thinning of softwoods mentioned in the 1933 report was continued until CWA was suspended. Improvements of great value were made to the plantations on the watershed. The oldest of these pines, planted in 1916, are now good sized trees. A considerable part of the cordwood could not be taken down off the mountain because of the deep snow and at the close of the work there was about 400

cords of wood to be taken out for the use of the Charity Department.

The planting of spruce and pine trees was continued as usual, 50,000 transplants being set out last summer. This planting, as well as the chopping and plantation improvement work, was done according to the suggestions of W. E. Bradder, District Forester. All of these projects come under the jurisdiction of the State Forestry Department.

WATER DEPARTMENT STATISTICS

*Total number of feet of main worked in 1934.....	8,398 1/2
*Total number of valves set in 1934 (Mains 17, Hydrants 12).....	29

CIVIL WORKS ADMINISTRATION AND

VERMONT EMERGENCY RELIEF ADMINISTRATION

The 1933 report describes the organization of the Civil Works Administration which provides federal funds for labor on municipal projects that may be classed as improvements and are not included in the regular budget. Maintenance or routine department work was not permitted with these funds.

The projects started in 1933 were continued in 1934 and new ones were added as needed. The quota of men varied at times, the peak of employment being in January when 453 men were included on the payroll. In March the CWA quota, rates and hours were gradually cut until the work was stopped on March 31st.

In place of the CWA the Vermont Emergency Relief Administration started functioning on April 6th. This was similar to CWA but with a shorter working week and smaller force of men. In this city 200 were allowed on this federal relief at first. The quota fluctuated at around this figure throughout the year until fall when the number was gradually increased to a total of 300 at the end of the year. This quota is fixed by the State Administrator, who also issues pay checks for the men, and approves projects on which work is performed.

To this local unit of the vast system of work-relief the federal government contributed \$145,314.89 in wages while the city was spending \$28,154.70 for material, tools, trucking, etc. Of the total of \$173,469.59 spent during 1934 the city's contribution was 16.2%.

Although the various projects have been described in previous quarterly reports, I will briefly summarize them.

AIRPORT. The bulk of labor on this project was surface grading. Knolls were cut and hollows filled to reduce the field to a flat surface. Besides this all stumps and brush were removed, fences were relocated, obstructing trees were cut, drains were laid in ravines, and some of the filled area was rolled. Practically all of the one hundred acres have been worked. At present, filling is being drawn to raise the level of ground in ravines. This filling material is the gift of Mayor Arthur W. Perkins.

ARMORY. The interior of the armory was repainted. The State of Vermont bought the material.

CAMPBELL ROAD. This highway was widened and graded from the Creek Road to the west city line. Drainage, culverts and guardrails were improved.

CHURCH ST. SEWER. A 36-inch trunk sewer, part of Main Area No. 1, was laid from West St. to Williams St. PWA will continue the work.

CITY FARM. At the Poor Farm very complete general repairs were made. All buildings were painted on the exterior, the new barn was painted inside also, and the house and dormitories were completely renovated and repainted. New plumbing was installed so that now there are two modern bathrooms in the men's section and one in the women's section with ample bathing facilities. A water heating system to supply these bathrooms was installed. The house heating system was improved and considerable carpenter work and plastering made necessary by the improvements was done. Necessary repairs to the electrical system were made.

CLEMENT ROAD WATER. A new 6-inch main west of Ripley Road was installed. This was described in the Water Department report.

CRESCENT ST. SEWER. A much needed sewer was installed on Crescent St. from a point near Lincoln Ave. to Main St. The old inadequate sewer had been a source of much trouble to the residents.

EAST CREEK. The creek from Crescent St. to below West St. was dredged, widened and the banks rip-rapped to prevent the flooding of adjacent streets. The value of this was proved during the flood period the second week of January, 1935. The high water was at all times confined between the banks where this work had been done.

EVERGREEN AVE. SEWER. An 8-inch sewer was laid on the north end of Evergreen Ave. and Hazel St. to accommodate houses that formerly drained into cesspools.

FIRE STATION No. 1. A new T-beam concrete floor was built throughout the station at ground level. Drains were installed under each truck position and hose connections for washing trucks were installed. A basement was dug under part of the structure. New overhead sliding doors were installed and the entire station was repainted.

GLEASON ROAD. The relocation of this road to bring it within the highway limits necessitated the cutting of the west bank. A dangerous curve was eliminated by filling a swampy section and moving the road over to the new location.

GRANGER ST. SEWER. A new main from near Franklin St. to South St. has greatly improved the runoff for the entire adjacent section.

HOPKINS ST. SEWER. A new line replaced an old inadequate pipe on this street.

HOWARD AVE. SEWER. An extension of the existing pipe easterly to accommodate two new houses was made.

JACKSON AVE. SEWER. This is a new 12-inch line east from Moon Brook to service four new houses that are being built.

LINCOLN AVE. SEWER. One of the most difficult VERA jobs was the installation of this sewer in an eighteen foot cut through the rock knoll north of Vernon St. At the same time the top of the knoll was cut to improve the road grade.

LITCHFIELD AVE. SEWER. A short extension of the 8-inch sewer was made to provide a connection for a new house.

MEADOW ST. SEWER. Part of Main Area No. 2 sewer, from School St. to West St., was built with 48-inch pipe. This will be continued up Cleveland Ave. by PWA.

MENDON. The cordwood cutting and plantation improvement has already been described in the Water Department report.

N. CHURCH ST. The culvert started in 1931 was completed, a large ledge was removed, the road graded and an 8-inch sewer built on this street between Tenney Brook and Vernon St.

N. MAIN AND WOODSTOCK AVE. SEWER. A part of the Main Area No. 1 system consisting of a 24-inch pipe on N. Main St. north of West St. and a 15-inch and 12-inch on Woodstock Ave. to Bellevue was constructed. When PWA installs West St. sewer on the hill this other new one will go into service.

PAINTING—CITY HALL. The entire interior of the City Hall was cleaned and walls were painted and woodwork and furniture was varnished and refinished.

PAINTING—SCHOOLS. The interiors of all city schools were renovated, painted and repaired. Exterior trim on the High School was also painted. This is perhaps the first time that every school room in the city was redecorated during one year.

SO. MAIN ST. SEWER. A new line varying in size from 18-inch to 8-inch and reaching from Moon Brook to Terrill St. and including a spur on Jackson Ave. was built to relieve drainage difficulties in this area.

SWIMMING POOL. The pool basin was cleaned with muriatic acid to remove algae and one coat of special paint was applied. It is the intent that another coat be put on before the 1935 season.

WEST ST. SEWER. A considerable part of the West Area Sewer, from East Creek to Temple's Crossing, was laid. Even this portion was a great improvement during summer storms. PWA is continuing the project.

PUBLIC WORKS ADMINISTRATION
DOCKET 1330, MOON BROOK SEWER

The report for 1933 contained a description of the functions of this drainage project as well as the early stages of its construction. Work continued during all of 1934 with a full force of about ninety men until December when it was necessary to reduce the gang as completion of the project was nearly accomplished.

This work was all "force-account," that is day labor under the supervision of the Public Works Department did the construction. At the end of December there remained only about seventy feet of 60-inch pipe to lay in the Howe Scale dump to complete the project. Storms and high water resulting in the flooding of the deep ditch at this point caused considerable delay and damage but the entire job will be ready to put into service early in 1935.

The total costs during 1934 are as follows:

Material, equipment, tools, supplies, repairs, etc	\$38,986 80
Labor, including supervision.....	64,591 09

Total spent in 1934..... \$103,577 89

The labor shown above is 62½% of the total which is even more satisfactory than the original estimate, which anticipated labor would be 61%. The material account, classified according to its principal items, includes:

Cement	\$7,328 00
Sand	738 00
Stone	2,912 33
Steel reinforcing and miscellaneous steel.....	705 29
Lumber and nails, for forms, shelters, jacking and sheeting.....	1,146 49
Hand tools, shovels, picks, etc.....	315 14
Equipment, gasoline locomotive, cars, boots, lanterns, parts and repairs for machines, ropes, chains, wheelbarrows, hoists, etc.....	748 51
Rental of pumps, mixers, compressors, jacks, trucks.....	1,521 05
Underdrain pipe and bulkhead bags.....	371 56
Precast concrete pipe.....	17,222 36
Coal for heating concrete during winter.....	212 85
Gas, oil, kerosene, grease for machines and equipment.....	1,122 42
Compensation insurance.....	3,758 45
Unclassified, including legal expense, interest on loans, and misc. materials such as brick, bolts, first aid supplies, wire, lime and telephone service.....	884 35
	<hr/> \$38,986 80

There were 12,800 bags of cement at \$.572 per bag, a total of 16 box-car loads; 1,142 cu. yds. of sand at \$.646; 2,008½ cu. yds. of stone at \$1.45 and 19½ tons of coal and coke at \$10.91. The precast pipe included 408 feet of 60 inch extra strength at \$7.63; 332 feet of standard 48 inch at \$5.44; 2,340 feet of 42 inch at \$3.59; 988 feet of 36-inch at \$2.84 and 440 feet of 30-inch at \$2.47. Machinery such as pumps, heaters, mixers, locomotive and crane consumed 5,578 gallons of gasoline at an average cost of \$.157; 1,730 gallons of kerosene at .088; 87 gallons of oil at \$.44; 92 gallons of oil at \$.503 and 95 pounds of grease at \$.087.

The entire sewer line as built consists of 782 ft. of monolithic reinforced concrete box sewer, 6 ft. x 4 ft. in size; 3,030 ft. of monolithic 60-inch pipe, 308 ft. of 60-inch precast pipe jacked into place under embankments, 100 ft. of 60-inch precast pipe laid in place in deep open-cut (now under construction); 332 ft. of precast 48-inch pipe; 2,340 ft. of precast 42-inch pipe; 988 ft. of precast 36-inch pipe, and 440 ft. of precast 30-inch pipe; a total of about 8,320 feet or 1.57 miles reaching from Killington Avenue to a point west of Forest Street.

WEST AREA SEWER, DOCKET 4840

This PWA project, which is nearly complete, was built during December. A 15-inch pipe was laid from Temple's Crossing to Crampton Ave. The work remaining to be done in more favorable weather consists of the railroad crossing at Temple's and East Creek crossing at West St. CWA laid the pipe between these two points early in 1934.

The costs of the 15-inch pipe job are:

Material, pipe, tools, supplies, trucking, etc.....	\$442 74
Labor and supervision.....	1,143 92
	<hr/> \$1,586 66

The above total cost distributed over the length of the job, 512 feet, shows an average cost of \$3.10 per foot. This cost includes three manholes. The precast reinforced concrete pipe cost \$.72 per foot, which is also included above.

MAIN AREA NO. 2 SEWER, DOCKET 4840

Actual digging had not been started until just after the close of 1934 but all preparations had been made to begin this 36-inch trunk line sewer on Cleveland Ave. Materials, tools and equipment had been ordered; the only cost in 1934, therefore, shows as material which was \$802.44.

This sewer will extend north on Cleveland Ave., east on Crescent St. and along Grove St., Tenney Brook and North St. to Pearl St.

MUSSEY BROOK SEWER, DOCKET 4841

Preparations were under way to start construction on this trunk sewer at the same time as Cleveland Ave. A few purchases of tools and materials—\$382.50—were paid for in 1934. This 42-inch and 24-inch precast pipe sewer will extend along beside Mussey Brook from Moon Brook to Curtis Avenue, crossing through the Fair Grounds where the present 10-inch line is laid.

All of the pipe for these PWA jobs about to be started was contracted for with a local concern, The Rutland Concrete Pipe Co. A total of about three miles of pipe, of sizes ranging from 15-inch to 45-inch, will be made. Local materials, excepting cement and steel, and local labor will be used exclusively in the production of this pipe. The total bid on the estimated quantities required is \$40,558.12 which when discounted for 10 day payment becomes \$39,746.97.

NATIONAL MUNICIPAL RECOVERY ADMINISTRATION

This federal relief work which is not as well known as the other alphabetical designations already described, provided con-

struction totaling approximately \$83,000 within the city. The exact amount is not yet available because the disbursing of this federal money, including both the purchase of material and payment of wages, was all done through the State Highway Department in Montpelier.

WOODSTOCK AVE. PAVEMENT. An 18-foot concrete roadway with an 8-foot bituminous strip on each side, a finished roadway 34-feet wide, was built by the Department of Public Works. The project extended from Woodstock Ave. to the city line at Gleason Road. This important highway improvement replaced a rock asphalt surface that was badly worn.

MAIN STREET RESURFACING. The Warren Bros. Roads Co. covered the concrete pavement with a Warcolite surface on North Main St. from the north line of the city to Kendall Ave. and on South Main St. from Madison St. to the south line of the city. In addition, bituminous side strips similar to those on Woodstock Ave. were built resulting in a pavement 34 feet wide.

These two projects provide excellent wide highways on U. S. Route 7 through the city and U. S. Route 4 going east. In 1935 the same division of federal funds will improve U. S. Route 4 (State Street) going west.

ENGINEERING DEPARTMENT

The routine work of engineering for all regular Public Works Department jobs was performed as usual. This includes surveys, design, layout, engineering supervision and inspection. Street lines and grades were furnished when requested by property owners.

This, however, was a small percentage of the total work of this department. All CWA, VERA and PWA projects required a large amount of surveying, designing, estimating, preparation of plans, inspecting and field work, all of which was done by this department. Tabulation of records and audits required by the federal government were also made.

Engineering work is now well in advance of all PWA projects that are starting early in 1935.

CONCLUSION

By far the largest program of Public Works construction ever attempted in this city was successfully completed during 1934. It is evident that a large share of it was made possible through federal relief funds and special city funds provided to make this federal money available.

Although the regular department activities were limited by a necessarily restricted budget, the results accomplished, especially in street maintenance and improvement, were very gratifying.

I wish to extend my appreciation for continuous cooperation and help to His Honor the Mayor, the Honorable Board of Aldermen, the City Officials, and members of other City Departments, Federal Officials including the local PWA office and the CWA and VERA Administrators and also State Highway officials. For the actual work accomplished the members of the Public Works Department deserve great credit.

Respectfully submitted,

EDWARD L. TRACY

Commissioner of Public Works.

Report of the Commissioner of Public Safety

To the Honorable City Council:

Gentlemen:

I hereby submit my report as Commissioner of Public Safety for the year ending December 31st, 1934.

FIRE DEPARTMENT

The Fire Department consists of one Chief Engineer, one Assistant Chief Engineer, two Captains, thirteen Privates and eight call men, one of which is the Department doctor.

The apparatus consists of two 750 gallon triple combination trucks, one combination chemical and hose truck, one 75 foot aerial ladder truck and a Cadillac service truck.

During the year the Department responded to 353 alarms as follows: telephone alarms, 300; box alarms, 37; verbal alarms, 11; and automatic thermostat alarms, 5. This is an increase of 59 over 1933 and the greatest number of alarms ever received in any year. The Department also responded to 21 Special Service calls.

The value of buildings endangered was \$1,952,861.00; the insurance carried on buildings was \$1,425,515.00 and the loss paid on buildings was \$15,491.28.

The value of contents was \$319,361.00; the insurance carried on contents was \$308,086.00 and the loss paid was \$10,491.31. The total value of property endangered was \$1,952,861.00; total insurance carried was \$1,733,601.00 and the total loss was \$25,982.59.

The cost of maintaining the Fire Department was \$35,126.33 and the inventory value is \$65,443.50.

The usual number of building inspections were made, fire alarm boxes and wiring gone over by the men in this department.

On May 2nd of this year, we had a call from Mrs. Jay Newton of Wallingford, Vermont, for a fire in her residence. No. 1 Triple Service combination with four men were sent from Station No. 1. The only place they could get water was from a small brook, some 800 feet away. In pumping from this brook, which was near a gravel highway, gravel and mud were sucked up into the pumping system, clogging same and damaging motor causing it to overheat. It cost us \$400.00 to put it in shape. The biggest part of the damage was caused at this time, although we did not realize it then but soon found out as on May 5th, three days after, we had a call from Mill Village for a fire at the residence of Arnold Rowe. Because the engine refused to work, the residence was burned down and could have been saved but for this. I was at this fire myself and I never in the number of

years I have had anything to do with the Fire Department have seen the boys so down in the mouth to think they could not do the service they are in the habit of doing.

This case and the expense to the City in answering calls from outside the City was brought to the attention of the Honorable Board of Aldermen at their next regular meeting and a committee was appointed, composed of Mayor Perkins, the Fire Committee of the Board, Chief Koltonski and myself, to draft a set of resolutions and a schedule of rates to be charged for the services of this department. June 2nd this was submitted to the City Council and approved as follows:

Distance from City to be within a radius of 20 miles.

Minimum charge for a single piece of apparatus and four firemen \$50.00.

Minimum charge for pumping, \$25.00 per hour or fraction of an hour. Calls from just over the City line, some of which could be reached from the City hydrants, to be left to the discretion of the Commissioner of Public Safety and the Chief of the Fire Department. They also to use their own judgment as to answering any calls, depending on the time of year and condition of the roads. Before answering calls, they are to be informed as to who is responsible for the call and the payment for services rendered as per this schedule. Not more than one piece of apparatus to be absent from the City at any one time. The authority for answering out of City calls to be left with the Commissioner of Public Safety.

West Rutland and Proctor, Vermont are not included in this schedule through an understanding with them. We are glad to help each other out in case of a big fire at any time.

We are extremely fortunate in keeping our fire loss at the figures shown above, when you consider we had the greatest number of alarms ever received in any one year, and I compliment this Department for their most efficient work.

POLICE DEPARTMENT

The membership of this Department is composed of the Chief of Police, two Sergeants, eleven Patrolmen and sixty-three Special officers.

The total of all arrests made during the year was 349. Of these, 206 were for intoxication, 11 for driving while under the influence of liquor, 39 for breach of peace, 2 for burglary in the night time, 20 for larceny, 26 for violation, and the remainder for various offenses.

During the year there were 60 miscellaneous thefts reported, 17 places reported broken into, 7 automobiles reported stolen, all recovered and returned to owners.

There were 304 places and stores found open by Patrolmen

and "Prowl" car Officers. These were locked and owners notified.

There were 901 automobiles tagged for violation of the parking ordinances; 61 of this number were second offenders. The money collected was turned over to the City Treasurer.

Seventy-four street lights reported out by Officers and there were 1722 persons given lodging.

Inventory of apparatus and equipment on hand shows a total of \$3,915.50. Detailed report of expenditures and receipts are shown elsewhere in the City Report.

In this report there was a balance in some items of the budget and this money was used to cover the deficit on other items. I mention a balance on the patrol car, as well as the motor cycle which was used only the week of the Rutland Fair. This money was used to help out the expense of the "prowl" car, as we used this in place of the patrol car, it being less expensive to operate.

I am very proud of the activities of the "prowl" car in that it has proved itself as to its value to the community it serves. I give a few figures of the duties performed as well as the mileage covered. Total miles scouting 24,311, total hours 3,162, calls answered 404, business places found open and locked by officers 111, average miles per night 67; there is no question but that this car has saved a lot of breaks in stores, factories, etc., on the outskirts of our City.

There was very little money spent on our Gamewell Police Signal System the past year. For that reason there will have to be quite a little spent on the system this year in order to have it efficient as there are a number of lines and boxes that are in very poor condition. This cannot be neglected as it is most important to this Department.

There was quite a little money saved this year by doing the work of painting and lettering the street signs by the officers themselves.

I am also pleased to report that the money appropriated in the spring for a Police Radio set, that was not delivered, was left intact and returned to the City Treasurer.

The automobile parking regulations that were put into effect this year, while they may not be perfect, have given very good satisfaction and the merchants tell me they have been well pleased. Most of the violations were by our own citizens. I wish to thank the different garage owners for their cooperation by making a very reasonable charge of 25 cents for day parking.

On the completion of this report, I wish to thank the Honorable City Council and the members of these two departments for the cooperation given me since taking over the office of Commissioner last April. Respectfully submitted,

JAMES C. DUNN,
Commissioner Public Safety.

RECORD OF FIRES OCCURRING IN THE CITY OF RUTLAND FROM JAN. 1, 1934 TO DEC. 31, 1934, INCLUSIVE

22	11:20 a. m.	Removed cat from tree

Report of City Attorney

To the Honorable City Council:

I hereby submit my report as City Attorney for the year ending December 31, 1934:

Two law suits were brought against the City of Rutland during the past year. The Town of Bennington vs. the City of Rutland, and Barker Cramton Estate and Howard Stearns vs. the City of Rutland. Both of these cases were settled by the City Attorney with the cooperation of the overseer of the poor and the city engineer respectively. A suit was brought by the City of Rutland vs. Alberta Fawcett for money expended by the City for the care of a prisoner on a closed jail execution, and upon trial of the case a substantial verdict was awarded to the City of Rutland and turned over to the City Treasurer. There are at this time no law suits in the court in which the city of Rutland is involved.

Several warrants were issued during the course of the year by your City Attorney for violations of city ordinances, and in each case there was a conviction and payment of fine.

Due to the present economic conditions a large amount of work was done with the Charities Department in regard to the proper care of paupers, and through investigation of many cases I believe that a substantial saving to the city of Rutland was achieved.

The Poormaster and City Attorney, during the course of the year, removed thirteen insane paupers to the State Hospital at Waterbury, thereby relieving the city of Rutland of their expense.

A number of collections were made with the aid of the City Constable, and a continuous effort was made to collect the taxes due the city of Rutland. Again this year as last, I have cooperated with the various city officials in the handling of the various contracts and grants in which the city was involved under the federal relief agencies. I have conferred with the federal officials in order that the city of Rutland might benefit from these grants. I have conferred with numerous city officials and have rendered my opinion whenever asked for upon matters of the city's business, and have at the request of the city council, from time to time, drawn up ordinances, contracts and other legal papers.

I wish to express my gratitude to Mayor Perkins, the Board of Aldermen and the various city officials for the friendly cooperation that they have always tendered me, and for the aid and courtesy which I have always received from them.

Respectfully submitted,

MILFORD K. SMITH,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1934.

Appropriation.....	\$45,000 00
Extra Appropriations.....	57,873 06

VERA WOMEN'S WORK PROJECTS

The City of Rutland was granted three sewing projects, under ERA regulation, during 1934. They were handled through the Department of Charities, supervision being granted to the Rutland County Chapter of the American Red Cross.

These projects produced 3,166 garments, 57 doz. diapers, 81½ dozen towels, 174 sheets, 251 cases and 3 quilts. The payroll total amounted to a little over \$4,030.

Material was largely supplied through VERA. The Red Cross supplied patterns and "finding," at an expense of about \$150, and donated supervision.

Ninety percent of the items made have already been distributed, through the co-operation of the Red Cross, to relief cases. Receipts have been taken from beneficiaries and filed with the Department of Charities. 3,423 yds. of material from the 1934 spring allotment were also issued for making up in the home.

A mattress making project for six months' duration was also granted to the city through VERA and started about December 1st under supervision granted the Red Cross; 94 mattresses were made during December. This project makes mattresses for a tri-county area, Rutland City receiving its share of the mattresses and the benefit of a weekly payroll of about \$135.

All supervisory and other work done by the Red Cross in co-operation with the Department of Charities on ERA project was entirely voluntary and without cost to the City.

The Inventory of livestock, farm implements, etc., at the Farm as of December 31, 1934 amounted to \$8,983.21. This is an increase over last year's inventory which amounted to \$8,009.21. In accordance with requirements, a complete itemized inventory is on file in the office of the City Treasurer.

I would extend the thanks of the Department to the Rutland County Chapter of the American Red Cross for their assistance in the distribution of the garments made under the VERA Women's Work Projects and to that organization and the Salvation Army for assisting in distributing 1,062 pairs of overshoes, 1,380 blankets, and 225 baby blankets, received through the Federal Relief program.

We have also had willing aid and co-operation from all city officials with particular reference to the advice, understanding and true aid of Mayor Perkins, in co-operation with us.

In closing, we would again wish to express our appreciation to the various city officials and all agencies who have been so helpful in assisting us in the work of relieving the poor in the past year.

Respectfully submitted,

FRANK W. DIGNAN,

Overseer of Poor.

Report of the District Nurse

To the Honorable City Council:

I hereby submit the following report for the year ending December 31, 1934.

The first duty of the nurse is to care for the sick, aged and infirm. Second, to look after the general welfare of the home and that of children of pre-school age.

Sick visits for the year numbered 2,017 and welfare visits 242. I cared for 26 maternity cases and made 97 prenatal visits to expectant mothers.

In co-operation with the American Red Cross, 60 layettes were made up, largely from the material supplied thru VERA, and given to the mothers who could not afford to provide the needed garments for their babies.

I have been instrumental in supplying clothing, medicine, shoes, milk, furniture, bedding, a stove, or toilet articles to 118 families.

Have attended eighteen meetings of the local Welfare Council, which gathering exchanges case information and studies the needs of dependents in the City. This year we have also been familiarizing ourselves with Federal resources available to us and the use of such material and assistance in the city and county area.

For several years past, the nurse has had the supervision of the rest room for mothers with small children at the Fair Grounds during the first week of September. Several hours a day were again spent this season. Mothers appreciate this service and the nurse is able to give some aid and suggestions which are of value in the homes.

Aid and cooperation were given to the usual various Thanksgiving and Christmas projects.

The nurse has been on call each and every day for the entire year. During the vacation month of July, the work was cared for by Mrs. Claude N. Capron.

The churches and kindred organizations have continued their interest and financial support through the year. The Ward Bus Co. has furnished free transportation on all lines.

The interest and co-operation given has been much appreciated and I have tried to faithfully perform such duties as I was called upon to undertake.

The expenses of the year have been as follows:

Salary for nurse and substitute ..	\$1,246 00
Supplies	75 00

This was met by the City appropriation of \$300, the annual ward canvass, patient's fees of \$154.00, and the Rutland Missionary Society who sponsor the District Nurse service.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse.

January 5, 1935.

Report of Health Officer

To the Honorable City Council, Rutland, Vermont:

Gentlemen:

I herewith submit my report as Health Officer for the year ending December 31, 1934:

The following communicable diseases were reported,

Chicken-pox	310
Whooping Cough	188
Scarlet Fever	34
Measles	6
Mumps	5
Typhoid Fever	1
Diphtheria	1
German Measles	1
Total	546

Sanitary inspections of stores, hotels, restaurants, barber shops, etc., 682. All school buildings were inspected and fire drills were given by Chief Koltonski of the Rutland Fire Department.

An unusual number of complaints, arising from the promiscuous dumping of garbage and rubbish, were investigated. Warning notices, furnished by the Public Works Department and Police Department, were posted in several places.

Inspections at the reservoir and along the water-shed were made at regular intervals and the annual inspection by the State Board of Health was made October 24th. Daily samples of water, taken from various parts of the city, were sent to the Department of Hygiene. The reports of these tests are on file at the City Hall.

The swimming pool, under the direction of the same committee and management as the previous year, was successfully operated. Water samples were collected daily and the reports from the State Laboratory show that healthful conditions were maintained through the season.

One hundred thirty-one pupils of the first grade of the Public and Parochial schools were immunized against diphtheria, at a cost to the city of Eighty-five and 99/100 Dollars.

Through the co-operation of the Sewer Committee of the Board of Aldermen many homes have been connected with the city sewer.

In conclusion, I wish to thank the Board of Health for their kindly direction and support, and the various officials and departments for their consideration and aid.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

To the Honorable City Council, Rutland, Vermont:

Gentlemen:

I herewith submit my report as Milk Inspector for the year ending December 31st, 1934:

Inspections of dairies and creameries totaled 952. Samples of milk and cream submitted to the Department of Hygiene for examination 645. The result of these tests have been published monthly in the Rutland Herald.

Reduction, sediment and lacto-densimeter tests have been made from all dairies selling milk in the city as often as was required to keep the milk up to standard. Sanitary inspections of stores where milk is being sold is included in the Health Officers report of city inspections.

During the year the milk ordinance of the City of Rutland was amended. The butter-fat standard was raised from 3.25 to 3.5 resulting in a better grade of milk to the consumer.

Nearly all dairies from which milk is being sold in the city are on the TB accredited list and two dairies are under Federal tests for Bangs disease. We anticipate several more dairymen will apply for this test.

We are greatly indebted to the Creamery Division of the Department of Agriculture for their assistance in aiding us in our effort to remove diseased cows from the dairies. Inspector R. A. Knowlton has assisted us seven days in testing the individual cows for mastitis.

We have attended dairy conventions during the year at Burlington, and the International Milk and Dairy Inspectors meeting at Boston. Much valuable information was given at these meetings.

The following licenses were issued,

Producers	79
Retailers	147
Peddlers	14
Wholesalers	2
Total	242

The sum of Five Hundred Twenty-eight Dollars was turned over to the City Clerk.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector.

Report of Department of Public Health

Statistics for 1934 compiled from certificates filed in the
City Clerk's Office.

Ticket admission	8,176
Free Admission	4,600
	<hr/>
	22,215
Total revenue	\$1,455 98
Total expenditures	1,330 05
	<hr/>
Profit	\$125 93

The pool was self sustaining during the 1934 season and showed a profit of \$125.93. It cost \$43.71 to replace windows broken by boys during the winter.

Classes were formed and instruction given in life saving. Tests were given at the completion of instruction. Four hundred

children enrolled in our two special "learn to swim" weeks. Competitive sports were held and suitable prizes given at the end of the season to the winners.

The pool was in operation 99 days and closed five because of cold or rainy weather.

I am grateful to the various department heads for their unfailing aid and courtesy shown me, and especially to the Health Officer. I enjoyed complete cooperation from the Parks and Playground Committee and the personnel of the pool.

JOSEPH BRISLIN,
Manager

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report for the period January 1st to September 17, 1934.

Houses	11
Additions to Houses	9
Repair Houses	1
Porches	7
Additions to Porches	3
Make Garages into Houses	1
Private Garages	22
Additions to Private Garages	4
Change sheds into Garages	1
Road Stands	2
Camps	1
Additions to Sheds	1
Greenhouses	1
Poultry Houses	4
Sheds	2
Barns	1
Business Blocks	5
Additions to Business Blocks	4
Repairs and Alterations to Business Blocks	2
Additions to Houses for Store Purposes	1
Storehouses	1
Laundries	1
Service Stations	1
Additions to Service Stations	1
Move Buildings	4

Respectfully submitted,

C. G. NOYES,
Inspector of Buildings.

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report from September 15, 1934 for the remainder of the year ending December 31, 1934.

New houses	3
House additions	5
Build porches	6
Garages	9
Rebuild garage into house	1
Enlarge garages	2
Hen houses	2
Build sheds	2
New store front	1
Gas and oil distributing station	1
Filling station and lubritory	2
Move buildings	2
Wreck building	1

Respectfully submitted,

GUY E. THAYER,
Inspector of Buildings

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1934:

Paid the City Treasurer for 689 weights.....	\$68 90
Weighing fees	34 45
Net	\$34 45
Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge	475
Total number of weights	1164

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

CIGRID B. PATCH,
Treasurer.

I have examined the above accounts and find them correct as stated.

CORNELIA C. PERKINS,
Auditor,

Report of Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

The cost of operating the schools of Rutland is less than five cents a day for each person of voting age. For this small sum the people of the city are able to provide the services of eighty-three teachers and eighteen other persons who minister to the needs of the children. In addition to these services a great many books are provided; over six hundred items of supplies ranging from adding machines to Yale locks are furnished; and buildings are kept clean and heated and in repair. A million dollar plant, in buildings and equipment, is kept adequately insured. The health of the children is safeguarded, and the school property grows constantly better. We have a right to feel pleased because we get so much for such a small sum.

After considering the problem for six months the Board came to the conclusion that it would be better to carry more insurance on school buildings and thereby secure a more favorable rate. The amount of insurance on buildings has, therefore, been increased from \$288,000 to \$600,000 and the rate on this item has been reduced from 2.34 to 1.54. The average cost of insurance the past few years has been \$1529. This has been increased to \$2112 under the new plan.

Your Board has felt for many years that the salaries of teachers ought to be maintained at the highest possible level. Our conviction on this subject is based on the present and ultimate welfare of the children rather than on a desire to provide better salaries to the present group of teachers however meritorious. The quality of the teaching service given a particular community depends on the ability of that community to offer attractive salaries and favorable teaching conditions. The salary of a teacher ought to be such that she can live without undue worry about her present and future economic situation and enough so that she can travel, keep in touch with the best in art, literature, and life and continue to improve as long as she remains a teacher. We reported last year that salaries in Rutland were low in comparison with the other cities of Vermont and the United States and promised to do all we could to better the situation.

We planned our budget for 1935 so that we could restore a part of the last cut in salary. Since the school budget was made however, a committee of citizens, appointed by the mayor to investigate the financial situation of the city, has reported and recommended that the schools be operated on the same tax rate that has prevailed during the past two years. While we are reluctant to deprive teachers of well earned additions to their present salaries we feel that the financial plight of the city and the future welfare of the schools merits careful consideration.

Last year we used 111 tons of coal more than the average for the three preceding years, an increase of 11.5%, and paid a higher price by \$1.13 a ton, an increase of 16.8%. The increased tonnage used and the higher price made our fuel bill \$2106 higher than the three year average. The cost per pupil per school day increased from 1.3 cents to 1.87 cents.

We hoped to carry over to 1935 a substantial balance, but our new insurance program cost about \$2000 to inaugurate, the cost of fuel increased by over \$2100, and our repair item was much larger than anticipated. The year 1934 was hard on the repair item in any case and in view of the fact that we spent about \$3500 for paint and other material and equipment for redecorating the interior of seven school buildings and repainting the outside of the high school, the pressure on this part of our budget became very great. The hope of any balance vanished as the year drew to a close.

The school buildings are in good repair and with a limited amount spent on outside painting during the summer of 1935 and 1936 they will be in excellent condition. The building committee advises that a new heating plant will be needed at the Kingsley School before long. The present plant has been in operation forty-six years so it is not surprising that replacement will be necessary in the near future. One unit at the Lincoln School is nearly as old as the furnace at Kingsley which may mean some expense before many years. Fortunately the heating systems of all the other schools are adequate and in good condition.

We recommend for the serious consideration of the people of Rutland:

1. An improved salary schedule for our teachers in order that we may compete on equal terms with the other cities of Vermont for the best teachers;
2. A better appropriation for maintenance in order that we may replace antiquated heating plants and improve grounds by laying walks and curbs and by doing some grading;

3. An increased appropriation, so that more money can be spent for library books, visual education and musical instruments.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS

By Joseph F. Cronan, *President*

Rutland, Vermont, February 4, 1935

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the forty-second annual report of the Rutland Public Schools and the fourteenth under the present administration.

Education is primarily concerned with the development of better human relationships; the mental, physical, and spiritual growth of individuals; increased understanding of the world as the home of man; and the inculcation and spread of ideas and ideals concerning God and man. A human being sometimes descends to such a low level of conduct that he is an insult to the animal kingdom but, on the other hand, he is capable of rising to such sublime heights of self-sacrifice and service to the world that hope for human betterment is constantly being renewed. The education of the human race, thus broadly conceived, becomes the most important function of life because by understanding alone can man be kept on the onward and upward path which leads from destruction.

The type of education under discussion begins at birth and continues as long as mental life survives and includes every agency that influences human lives. In general, people think of education as concerned with such skills as multiplication, the correct spelling of insurance, and declension of Latin nouns or, at best, the accumulation of a vast array of facts. All these things, while necessary, are relatively unimportant and trivial as compared with the larger issues of life. The world is full of people who delight in making a vain show of learning which has no effect whatever on prejudice, on manners, or on character.

The possibilities of education are limited only by native talent, environment, and the choice of the individual. Equality in education must mean that each person has a right to the type of education which his capacity permits and has no relation whatever to uniformity in subject matter. We are inclined to say that the child who does poorly in the traditional subjects cannot be educated. As a matter of fact every person, unless mentally ill, can be educated and can become a social asset instead of a liability. The richer program now being offered in the schools tends to make equality a fact instead of a rhetorical expression. The task of the school and

society is to control the environment so that each person can become actually all that he is potentially and to stimulate him so that he will desire to become a self-supporting and contributing member of society.

Every little while some uninformed person comes forward with the hackneyed argument that the schools cost too much because the program of education is richer in content than it was twenty or forty or sixty years ago. The schools cost more because there are more children, especially in the upper grades, and because the whole economic level is higher than it was. The item on education in the social budget has not increased as much as the items covering amusement, insurance, travel or scores of others in the list.

The cost, fortunately, is not increased by a more liberal offering in the schools of a city the size of Rutland. A hundred children divided into three classes can be taught music, or drawing, or current economic problems as cheaply as the same children can be taught mathematics or Latin or bookkeeping. The cost of education in Rutland today depends on the number of children enrolled, the size of the classes expedient for good instruction and the management of the schools. Two neighboring cities employ twenty more teachers than Rutland for about the same number of children. This may mean poor management, or it may mean that those cities desire to have smaller classes in order to secure better instruction for the children.

The subject matter to be offered in the schools can never be settled to the satisfaction of everyone. The field of human activity past and present is so vast that it is impossible for any one to be well informed and prepared to act wisely in many departments of life. It is certain that not more than half the time spent in the first six years of school life is required for the basic school subjects of reading, writing, spelling and arithmetic. This leaves half the time of the first six years and all the time of the last six years to be devoted to subjects which have to do with character, culture and citizenship. A noted leader in America has said that the outcome of education ought to be sound character, pleasing manners and intellectual power. If a person possesses the latter without the other two he is not educated.

Leaders in education all over the country are more and more testing subject matter by these criteria. Subjects win a place in the curriculum because they have something very definite to do with the development and growth of children in character, culture and citizenship. Using this means of testing the value of the subjects to be offered, a course in economic citizenship may be more important for a large number of children than some of the traditional subjects.

Some new services which seem to increase the cost ought to be added to the offering of the schools from time to time. The nursing service provided for the children of Rutland costs about fifty cents per year per child, but is, as everyone now believes, justified on the grounds of sound economy and social welfare. Sometime in the near future it would be well to employ a specialist in the field of mental health in order that the emotional and mental life of children may receive the attention its importance merits. Fifty cents per year per child spent on prevention of mental and emotional upsets might save a good many children from an institutional life or suicide.

After the subject matter has been selected it still remains for the teacher to present it in such a way that it will appeal to the children and become a part of their working knowledge for life. At this point the art and personality and manners of the teacher are manifest. If she has a burning zeal for the enlightenment of children and a real understanding of life, the lessons are bound to be effective and vital. The teachers of Rutland have become more and more conscious of the importance of their work and are constantly improving their knowledge and understanding. The Rutland Teachers' Association sponsors an extension course each year and many teachers are organized in groups for the discussion of social, political and economic problems.

The men and women in the school department feel like rendering the best possible service to the children and people of Rutland because the evidence of good will toward them and confidence in their ability to serve wisely is so very evident. We hope to continue to grow in understanding of human problems so that all people will know that the teaching force of Rutland attacks all questions with an unprejudiced mind, demands all pertinent facts, and faces with courage the conclusions necessarily reached.

Respectfully submitted,

WILLIAM W. FAIRCHILD,

Superintendent of Schools.

Rutland, Vermont, February 4, 1935.

Statistical Report of the Rutland Public Schools

RUTLAND PUBLIC SCHOOLS FINANCIAL STATEMENT FOR FISCAL YEAR ENDING DECEMBER 31, 1934

Grace Martell	High School	55 Morse Place	769 00	1929
Gustaf G. Melen	High School	3 Avenue A.	972 00	1932

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, City Constable and Sinking Fund Commissioners, from January 1, 1934 to December 31, 1934, inclusive, and we hereby certify that, IN OUR OPINION, they have duly accounted for all monies received by them.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1934, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

GEO. A. SABIN,
ARTHUR E. CROWLEY,
JOHN W. BURKE,

Auditors.
